European E-Theses

http://www.ukoln.ac.uk/repositories/european-e-theses/index/European_e-Theses

- European working group under the Membership Committee of ND LTD
- "European e-Theses Demonstrator" ETD 2007

- Aim: To stimulate European doctoral ETD developments
- Objectives:
 - Good practice: identify common problems and solutions, especially on making doctoral e-theses openly available and accessible.
 - Encourage compatibility where appropriate .
 - Identify where limited joint activity would be beneficial, and plan and pursue this joint activity.
 - Prepare the e-theses domain to participate fully in the emerging wider interoperable network of European digital repositories, within an international context.
 - Avoid unnecessary duplication of effort.

European e-Theses

Welcome to the GUIDE European e-Theses Wiki

GUIDE = Guiding Universities In Doctoral Etheses

This site represents and coordinates activities by volunteers to coordinate work across Europe in the field of electronic theses and dissertations. For more detailed and up-to-date information, please navigate using the menu to the left. This will also give you contact information for those leading the particular pieces of work, should you wish to get involved.

Key points in the timeline so far are:

- The activity was pushed forward at a meeting in Amsterdam in January 2006, and scoping work proceeded in 2006 along four strands: legal issues, organisational and cultural issues, technical issues and links beyond Europe (such as to the [NDLTD](#)). Discussion document [June06_etheses_next_steps_v2.doc](#) - this outlines the outcomes from the Amsterdam meeting and the work that is underway.
- A meeting in Uppsala in November 2006 resulted in agreement to seek the status of an NDLTD working group, now achieved. A workplan was also agreed, detailed in the [notes from that meeting](#).
- Work is now ongoing on two fronts, with a view to presenting the outcomes of the work at [\[1\]](#) ETD2007 in Uppsala in 2007. The first is an interoperability demonstrator, and the second is an information and advice centre based around a website - see [Website_Planning](#) page (in development; please get involved by emailing <n.jacobs@jisc.ac.uk>).

Knowledge Exchange Institutional Repositories Workshop Strand E-Theses

<http://knowledge-exchange.net.dynamicweb.dk/Default.aspx?ID=64>

- **goal:** make e-theses in Europe better retrievable and therefore visible via institutional repositories.
- Metadata:
 - Identify e-thesis specific elements on a national level or in broader int. coop.
 - Identify e-thesis specific encoding on a national level
 - Identify cultural issues, language, graduation level
- Use e-prints application profile as a kick off towards developing a European Application profile which incorporates e-theses specific information
- E-theses have to be seen as e-publications as part of the wider e-publications picture
